

## HYP CUP 2013 INTERNATIONAL STUDENT COMPETITION

Shanghai Hyp-arch Architectural Design Consultant Inc. has announced the results of the international competition UIA – HYP CUP, open to architecture students worldwide. Sponsored by the Chinese universities Tsinghua, Tongji and the University of Southern China, this competition is organized annually in cooperation with Chinese Urban Environment Design (UED) magazine press.

Participants were invited to respond to the radical formula, “Architecture should disappear” and to imagine solutions in the face of new contexts: the landscape, the dialogue between the interior and the exterior, and between private lives and public spaces. The fundamental idea was to detach ourselves from the notion of the architectural object and to put into question the finite character of architecture.

### Prize Winners

#### First Prize

##### “Imprint-life”

Xing Teng, Liu Xiaoyang, School of Architecture at the University of Tsinghua

#### Second Prize:
